To the Resident,

Significant tree vandalism in Fowler Street, Chelsea

Our Urban Forest Team manages over 100,000 trees in Kingston, and we often receive feedback that they are valued community assets. We regularly inspect our trees to ensure they are in good condition, remain safe and continue to provide a range of health and environmental benefits for wildlife and the community.

We were disappointed to discover that eight young nature strip trees on Fowler Street have been deliberately vandalised, having been ripped out by the roots. This will likely result in their deaths (see images overleaf).

As part of our ongoing nature strip tree-planting objectives, we will replace these vandalised trees. The area will also be regularly monitored by Council staff to detect any further vandalism.

Damaging Council's trees is an offence under our local laws, and we are interested in receiving further information, including photographs or CCTV footage, that could assist with our ongoing investigation.
