

April 2025

Plummer Road, Mentone – Drainage & Footpath Improvements – Updated Design

Every year we invest significantly in Kingston's roads, paths, and drainage network to support the current and future needs of our community.

In March we notified residents of an upcoming stormwater drainage upgrade project in Plummer Road, Mentone on the western side (in front of 69-73 Plummer Road) to improve functionality of the existing drainage system.

We've updated the plan to add more drainage in front of 73 Plummer Road to help prevent flooding during heavy rain.

The improvements are shown on the following page and include:

- Construction of new underground drainage pipes and pits under the footpath and road pavement.
- Reinstatement of existing property stormwater connections.
- Footpath reconstruction.

Construction Details

Works are expected to be undertaken in mid-2025 and will take approximately 4 weeks to complete. More specific information regarding timing of the works will be available when a contractor is appointed by Council.

There may be times when some residents have limited access to their properties and nearby pedestrian areas during the works. We will inform affected residents beforehand, provide signs for alternative routes, and try to minimise disruptions to the community.

Additional information will be provided closer to the commencement of the work, with details on who to contact during construction.

We look forward to delivering these improvements for the community.

Further information

For further information relating to this project please contact Mia Watkins, Design Engineer or Fleur Gascoyne, Coordinator Strategic Projects via email Info@kingston.vic.gov.au or on ☎ 1300 653 356.
