

September 2025

Drainage Upgrade at Tippet Street, Clayton South

Every year we invest significantly in our roads, footpath, and drainage network to support the current and future needs of our community.

We plan to construct a new drainage network along Tippet Street and Second Street. These works will include the reconstruction of road pavement, kerb and channel, and footpaths to increase stormwater storage capacity (*plan overleaf*).

These improvements are designed to help address flooding issues in the neighborhood and enhance overall community resilience.

All significant trees will be retained, and tree protection measures will be in place during the works.

Construction details

Works are expected to start in mid-2026, and take around 12 weeks to complete (weather permitting).

Closer to the time of construction additional information will be provided, with details on who to contact during construction.

The construction works will restrict vehicle access to some properties for short periods of time. We will aim to minimise disruption and will provide signage for to guide alternative pathways.

We apologise for any inconvenience during the works and look forward to delivering these improvements for the community.

Further information

For further information relating to this project please contact Laura Wen, Design Engineer or Darren Stephens, Coordinator Major Designs via kingston.vic.gov.au/contact-us or on 1300 653 356.
