ROY DORE RESERVE, CARRUM

Final Landscape Concept Plan

For public consultation last October during which two landscape options were circulated to the local community, Option Two was chosen as the preferred option by a majority of respondents. Option Two has been used as the basis of the final landscape concept plan. The plan also includes other suggestions from the consultation process. Please refer to the plan on the right.

Following a second round of public consultation in March/April 2010, including a Public Meeting, a Final Landscape Concept Plan has been prepared.

Key elements of the plan include:

- The creation of a new vehicle access point at Dyson Road using part of the existing tennis club access road.
- The installation of a new car park located next to the cricket Pavilion.
- The removal of the existing gravel car park located on the northern side of the West Oval.
- Formalising the existing car park located next to the Northern Pavilion.
- The improvement of playground facilities including the installation of barbecues, picnic shelters, bins and new park furniture.
- The proposed installation of a new public toilet facility.
- The construction of pedestrian paths.
- Park tree planting.
- Park fence unification.
- The creation of an indigenous planting corridor on the northern boundary of the park.

Match day car parking will be permitted around the East Oval.

Through traffic between the Graham Road and Dyson Road entrances will not be possible.

It is proposed that the works will be funded over a two-year period with 2010/11 works to include:

- Playground refurbishment including the installation of new equipment, new barbecue facilities and park furniture.
- The construction of the new Dyson Road entrance and cricket pavilion car park.
- The removal of the existing gravel car park located on the northern side of the West Oval.
- Park tree planting.
