## Traffic Management Plans for the Parkdale Precinct

### Background

Council is continuing to invest in improving pedestrian safety and the management of traffic in local streets close to Parkdale railway station.

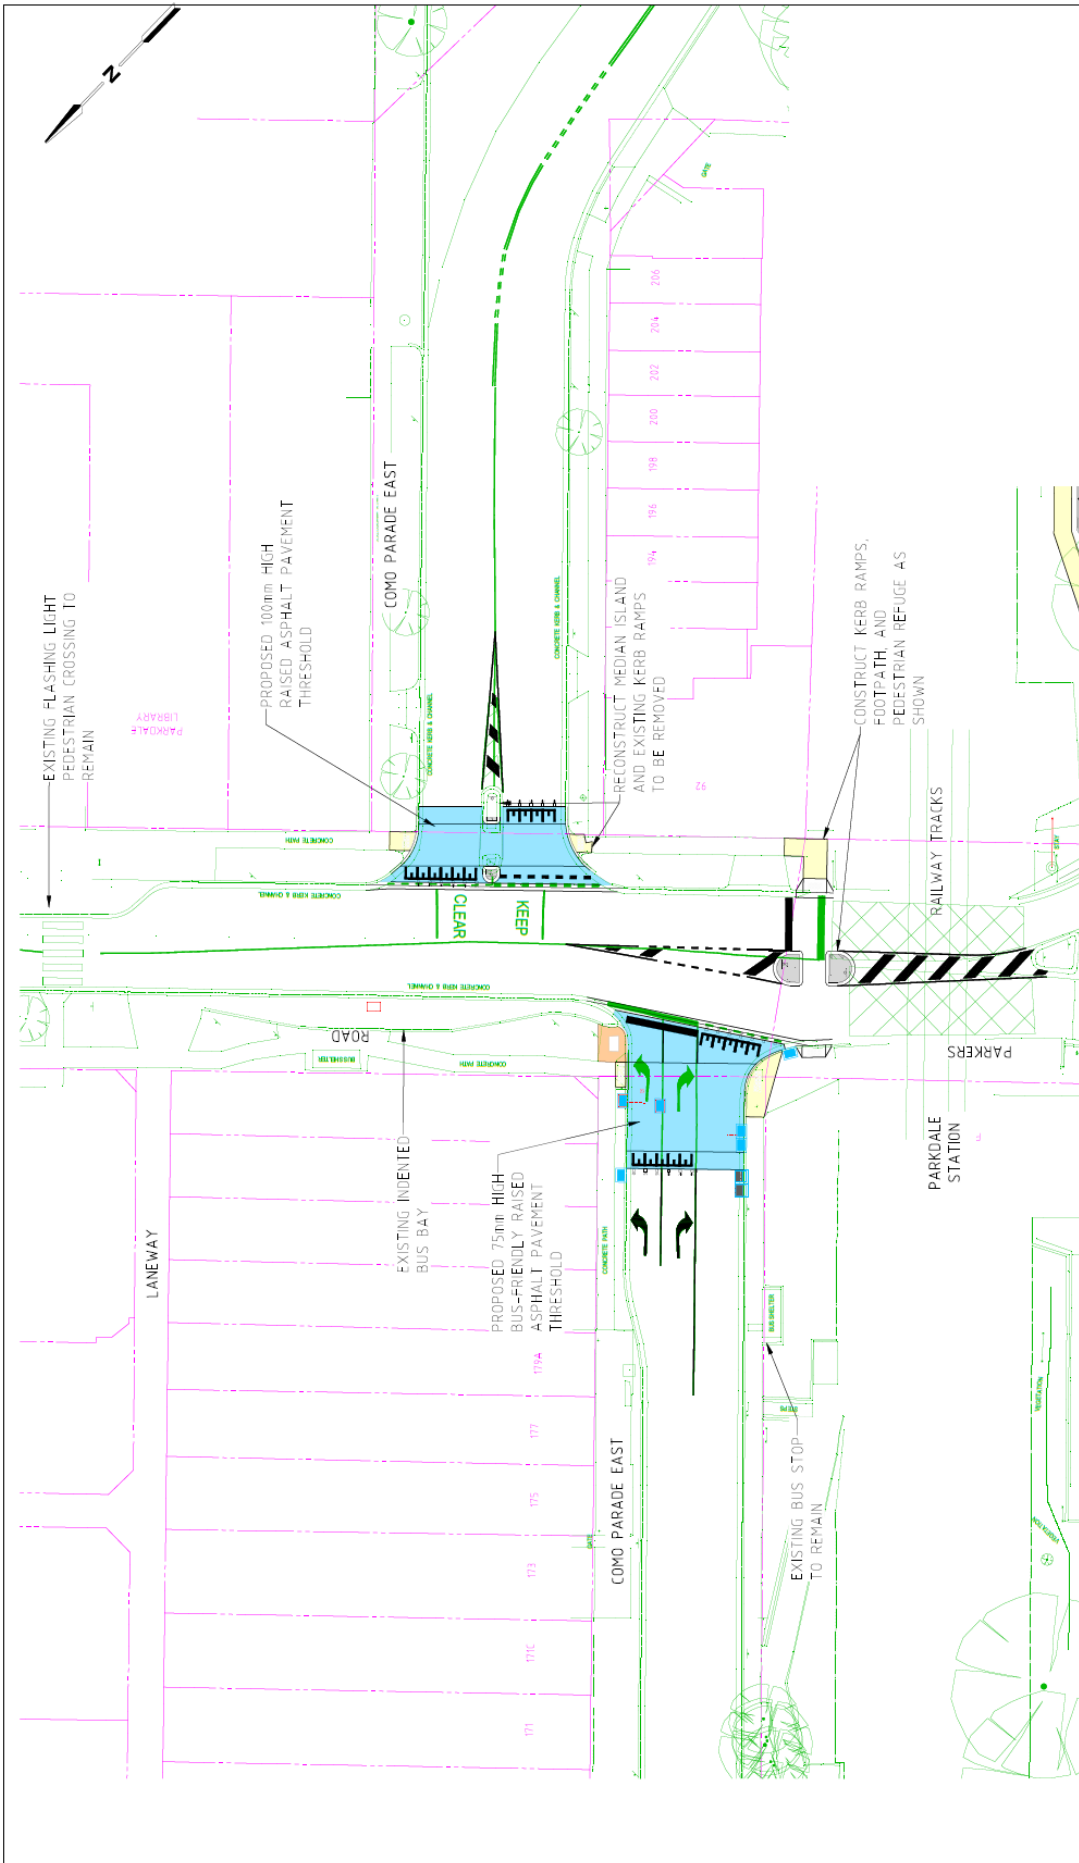

Council is about to start detailed design of further works close to the station (see attached plan) which will include:

- Como Parade East - 'raised asphalt pavement thresholds' - these are speed humps located on Como Parade East close to the intersection with Parkers Road
- Parkers Road - a pedestrian refuge island just east of railway crossing and west of the driveway of 92 Parkers Road.

These works are expected to be constructed in the 2020/2021 financial year. Council will provide a further update closer to the start of the works.

### Further Information

For further information, please contact Senior Traffic Engineer Alex Reid on 1300 653 356.
