To the Resident,

Update: Roy Dore Reserve Facility Improvements

With the easing of COVID-19 restrictions and the recent completion of the new sports pavilion and upgrade of sports lighting, we are excited to see local clubs take to the field and courts again at Roy Dore Reserve.

The next phase of work will involve Council delivering new netball and upgraded tennis courts for the community.

These improvements are part of a \$9 million program of works at Roy Dore Reserve, jointly funded with contributions from the Victorian Government and Council.

Key Dates

- Netball and tennis court works start late 2021
- Tennis pavilion to be commenced in 2022
- Dog off-leash area – available for use early 2022

Upcoming works: Netball and tennis courts

Works to construct two outdoor netball courts with sports lighting and tennis court upgrades, including four synthetic sand filled courts and two hard courts, are expected to commence next month.

The works are planned to occur over a six-month program and cost approximately \$1.5 million.

Tennis pavilion

The Long Beach Tennis Club and Council have worked closely to develop a fit-for-purpose floorplan for the renewal of the tennis pavilion. The new pavilion will include change facilities, community room, toilets and storage facilities. It will remain in the same location.

Further information will be provided to local residents in early 2022.

Dog park improvements

The dog-off leash upgrades are well underway and will be open to both two and four-legged residents in early 2022.
