

July 2026

To the Resident,

Tootal Road Upgrades, Dingley Village

Every year, we invest in Kingston's roads, paths, and drainage networks to support the current and future needs of our community. This year, we will be carrying out important upgrade works along Tootal Road, Dingley Village, between McClure Road and the Dingley Bypass. These works are part of our commitment to improving road safety, drainage and active transport connections for the local community.

Project details

Works will include (plan overleaf):

- a full road reconstruction with new surfacing and intersection improvements
- drainage upgrades to address flooding that has affected the area during heavy rain, and
- a new Shared Use Path (SUP) that will provide a safer route for people walking and cycling along the corridor, as well as a new pedestrian island across Tootal Road.

While trees will need to be removed to accommodate the road reconstruction and SUP within the road reserve, we have endeavoured to retain as many mature trees as possible and aligned the new SUP around some of them. New trees will be planted locally at a 3:1 ratio - meaning more trees will be planted than removed, improving long-term canopy cover for the community.

Timing and impacts

Construction is planned to commence in late-2026. Additional details, including timelines and contact information for construction-related queries, will be shared closer to the commencement of works after the contractor has been appointed.

We look forward to delivering these improvements for the community.
